

# Community conversation

NORTHWEST ASSOCIATION FOR BIOMEDICAL RESEARCH

## *You are what you eat: antibiotic resistance from chickens to your table*

Explore the connection between chickens and human health, including cool science facts about antibiotic resistance. Discuss the economic and health impacts of the use of antibiotics in large scale chicken farming.

Co-facilitated by Heather Fowler, VMD, MPH and Paul Pottinger, MD, *University of Washington*

**September 1, 2015 5:45 - 7:30 p.m.**

Kakáo Chocolate + Coffee

415 Westlake Ave. N., Seattle, WA 98109

**NWABR Members and students \$5 General admission \$10**

Includes discussion, appetizers, espresso, first glass of wine/beer if 21+

### What are Community Conversations?

Each informal Conversation explores a topic in biomedical science and its relationship with ethics, medicine, research and society, connecting people to the biomedical research community. Learning from each other, our goal is to help people thoughtfully engage in and advance biomedical research. Everyone is welcome. No science background necessary.

In partnership with Union and 415 Westlake
