- Students can substitute a higher-level BIOST course for BIOST 511 or BIOST 517.
- Students can substitute a higher-level EPI course for EPI 511.
- ENV H 583 requires that students take 2 credits of either ENV H 700 (Thesis Preparation) or 600 (Independent Study) concurrently. If ENV H 700 is taken as part of this requirement, those 2 credits can count towards the minimum 9 credit ENV H 700 requirement. If a student takes ENV H 600 concurrently or chooses to take an additional 2 credits of ENV H 700 above the minimum 9 credit requirement, those 2 credits may count towards the elective requirement.
- Students select electives from the following list in consultation with their faculty advisor:
 - ENV H 441: Food Protection [W, Sp] (3)
 - ENV H 442: Zoonotic Diseases and Their Control [W] (3)
 - ENV H 461: Air Pollution Control [Sp] (4)
 - ENV H 542: Detection/Control of Env. Transmitted Microbiological Hazards [W] (3)
 - ENV H 543: Quantitative Microbial Risk Assessment [Sp] (3)
 - ENV H 556: Quantitative Occupational Exposure Analysis [W] (3)
 - ENV H 570: Occupational and Environmental Epidemiology [Sp] (3)
 - ENV H 574: Probabilistic Exposure Analysis [Sp] (3)
