

Environmental Health Seminar

Department of Environmental & Occupational Health Sciences

GREEN CHEMISTRY

SAFER BY DESIGN

photos & illustration by Letty Limbach

Paul Anastas, PhD

Director, Center for Green Chemistry & Green Engineering
Teresa & H. John Heinz III Professor in the Practice of Chemistry, Environment School of Forestry & Studies, Yale University

Dr. Anastas is credited with establishing the field of green chemistry. Anastas served as the Assistant Administrator for the US Environmental Protection Agency and the Agency Science Advisor from 2009–2012. From 2004–2006, he served as Director of the American Chemical Society Green Chemistry Institute in Washington, DC. Dr. Anastas has been the Assistant Director for the Environment in the White House Office of Science and Technology Policy, where he worked from 1999–2004. He is also

12:30pm - 1:20pm
Thursday, May 9
MHSC T-435

the author (with John Warner) of *Green Chemistry: Theory and Practice*, which takes a broad view of the subject and touches on the design of safer chemical products.

This seminar is free and open to the public.
