

2023 Pilot Project and Mini-Grant Programs

Research Funding Announcement

Call for Proposals

The Pacific Northwest Agricultural Safety and Health Center (PNASH) offers two funding opportunities to projects seeking to improve the health and safety of farming, fishing, and forestry communities in Alaska, Idaho, Washington, and Oregon.

Apply

deohs.washington.edu/pnash/opportunity

- **Outreach Mini-Grants - \$2,000 to \$7,500**
Provides funding opportunities for industry and community organizations to launch education activities. Examples include:
 - Delivering health & safety trainings or workshops
 - Expanding existing outreach activities
 - Enhancing workplace safety program

For questions, contact Dennise Drury at dodrury@uw.edu.

- **Pilot Project Program - Up to \$30,000**
Provides funding opportunity for researchers seeking to conduct pilot research studies to inform future large-scale research projects. Examples:
 - Exploring new directions in research
 - Evaluating workplace interventions
 - Developing innovative safety solutions

For questions, contact Judy Lysiak at pnash@uw.edu.

Pilot Program Timeline	
Pilot Pre-Proposal Due	6/01/23
Invitation to Submit	6/16/23
Pilot Final Proposal Due	7/21/23
Project Period	Oct-Sept

About PNASH Center

PNASH Center is dedicated to the prevention of injury and illness among agricultural workers, producers and their families. The Center is focused on safe and sustainable agricultural workplaces and communities with an emphasis on injury and illness prevention, especially among hired laborers, migrant/seasonal workers, and children. Our approach includes:

- Working in partnership with employers, workers, agencies and other research and service organizations.
- Conducting innovative research and intervention programs that focus on problem solving.
- Taking solutions to the workplace through training, outreach and participatory research.
