Required Coursework

		Credits
DEOHS Common Core		
BIOST 511 (Medical Biometry I, Autumn)		4
EPI 511 (Introduction to Epidemiology, Autumn)		4
HSERV 579 (Structural Racism and Public Health, Autumn/Winter/Spring)		1
ENV H 501 (Foundations of Environmental & Occupational Health, Autumn)		4
ENV H 502 (Assessing & Managing Risks from Human Exposure to Env. C	Contaminants, Winter)	4
ENV H 503 (Adverse Health Effects of Environmental and Occupational Toxicants, Autumn)		4
ENV H 580 (Environmental and Occupational Health Sciences Seminar, A	Autumn/Winter/Spring)	2 x 1 = 2 ¹
Area of Emphasis: Environmental Tox	icology	
ENV H 515 (Organ System Toxicology, Winter)		3
ENV H 516 (Toxic Agents: Effects and Mechanisms, Spring)		3
ENV H 577 (Risk Assessment for Environmental Health, Autumn)		4
4 credits from any combination of:		
ENV H 591 (Current Topics in Toxicology, Winter, 2 cr.)		4
ENV H 593 (Current Topics in Risk Assessment, Autumn/Spring, 2 cr.)		
Choose one from the following:		
ENV H 531 (Neurotoxicology, Winter - even years, 3 cr.)		
ENV H 532 (Reproductive and Developmental Toxicology, Winter - odd years, 3 cr.)		2 (min.)
ENV H 533 (Molecular Toxicology, Quarter TBD, 3 cr.)		
ENV H 567 (Mechanisms of Carcinogenesis, Quarter TBD, 2 cr.)		
Elective Courses ²		Varies
Culminating Experience (Thesis)	
ENV H 583 (Thesis Proposal Preparation, Spring)		1
ENV H 700 (Master's Thesis, All Quarters)		9
	Total Minimum Credits	62

- 1. Two quarters of ENV H 580 are required for a total of 2 credits.
- 2. Student works with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes (e.g., EPI, BIOST, GH, etc.).

Additional Requirements

• Students in this degree program are required to complete a research thesis.

Sample Schedule

ENV H 700

Master's Thesis

The schedule below includes <u>non-elective courses only</u>. Students work with their faculty adviser to identify additional courses to reach or exceed the total minimum credit requirement. Elective courses can be ENV H courses or courses from other prefixes (e.g., EPI, BIOST, GH, etc.).

	FIRST YEAR	
	Autumn Quarter	
BIOST 511	Medical Biometry I	4 cr
EPI 511	Introduction to Epidemiology	4 cı
ENV H 501	Foundations of Environmental & Occupational Health	4 c
ENV H 503	Adverse Health Effects of Environmental and Occupational Toxicants	4 c
Non-Course	work Milestones: Work 1-on-1 with your Initial Faculty Mentor to identify possible thesis projects	
	Winter Quarter	
ENV H 502	Assessing & Managing Risks from Human Exposure to Env. Contaminants	4 cr.
ENV H 515	Organ System Toxicology	3 cr.
NV H 580	Environmental and Occupational Health Seminar	1 cr.
ENV H 591	Current Topics in Toxicology	2 cr.
	Additional course from pick list (see table below)	Var.
Non-Course	work Milestones: Continue working with your Faculty Mentor to identify possible thesis projects /	
dentify a Th	esis Adviser by the end of the quarter	
	Spring Quarter	
HSERV 579	Structural Racism and Public Health	1 cr.
NV H 516	Toxic Agents: Effects and Mechanisms	3 cr
ENV H 580	Environmental and Occupational Health Seminar	1 cr
ENV H 583	Thesis Proposal Preparation	1 cr.
ENV H 593	Current Topics in Risk Assessment	2 cr.
ENV H 700	Master's Thesis	1 cr.
Non-Course	work Milestones: Write thesis proposal and form Thesis Committee	
	Summer Quarter	
Non-Course	work Milestones: Begin thesis project as outlined in thesis proposal	
	SECOND YEAR	
	Autumn Quarter	
ENV H 577	Risk Assessment for Environmental Health	4 cr.
ENV H 700	Master's Thesis	3 cr.
Non-Course	work Milestones: Continue work on thesis project	
	Winter Quarter	
ENV H 700	Master's Thesis	2 cr.

Non-Coursework Milestones: Present at Graduate Student Research Day / Defend and submit thesis

3 cr.

Degree Competencies

Upon completion of this degree program, you will be able to:

School of Public Health -- All MS Students

- Explain public health history, philosophy and values
- Identify the core functions of public health and the 10 Essential Services
- Explain the role of quantitative and qualitative methods and sciences in describing and assessing a population's health
- List major causes and trends of morbidity and mortality in the US or other community relevant to the school or program
- Discuss the science of primary, secondary and tertiary prevention in population health, including health promotion, screening, etc.
- Explain the critical importance of evidence in advancing public health knowledge
- Explain effects of environmental factors on a population's health
- Explain biological and genetic factors that affect a population's health
- Explain behavioral and psychological factors that affect a population's health
- Explain the social, political and economic determinants of health and how they contribute to population health and health inequities
- Explain how globalization affects global burdens of disease
- Explain an ecological perspective on the connections among human health, animal health, and ecosystem health (e.g., One Health)
- Recognize the means by which social inequities and racism, generated by power and privilege, undermine health

DEOHS -- MS in Environmental Health Sciences

- Apply the major components of the environmental and occupational health framework (problem formulation, hazard identification, dose-response assessment, exposure assessment, risk characterization, risk communication, risk management, evaluation, stakeholder engagement, and research) in order to address environmental public health problems experienced in the community or work environment
- Use epidemiological and statistical techniques to describe and analyze environmental and occupational health
- Formulate hypotheses and design experiments to test such hypotheses aimed at advancing knowledge in environment and health sciences

DEOHS – Area of Emphasis: Environmental Toxicology

- Define the major classes of toxicants present in the environment and the workplace and describe their sources, pathways, and routes of exposure
- Describe and analyze how toxicants interact with biological systems and the mechanisms by which they elicit adverse effects in humans and other organisms
- Explain the core principles of research ethics and apply these principles to specific research projects
- Discuss regulatory authorities responsible for assessing toxic hazards
- Describe relevant toxicology-related health and safety regulations
