

Course Syllabus

 Edit

ENV H 452/542: Environmental & Occupational Health Microbiology II: Detection and Control of Environmentally Transmitted Pathogens

3 credits, Graded

Kelsey Jesser, PhD

John Scott Meschke, PhD

Quarter: Spring 2024

Time: Mondays, Wednesdays & Fridays, 11:30 AM to 12:20 PM

Location: In person, HSEB 245

Instructors and TA:

John Scott Meschke, Professor (he, him, his)

Office: 4225 Roosevelt Way NE, Suite 2337

Phone: 206-221-5470

Email: jmeschke@uw.edu

<mailto:jmeschke@uw.edu>

<mailto:tmb@uw.edu>

Office Hours: by appointment

Kelsey Jesser, Clinical Assistant Professor
(she/her/hers)

Office: Hans Rosling Center for Population Health,
Room 244

Email: kjesser@uw.edu (<mailto:kjesser@uw.edu>)

Office Hours: by appointment

Hannah Dye, Teaching Assistant (She, Her, Hers)

Email: hdye@uw.edu (<mailto:hdye@uw.edu>)

Office Hours: by appointment

(<mailto:fellowsk@uw.edu>)

Land Acknowledgement

The University of Washington acknowledges the Coast Salish people of this land, the land which touches the shared waters of all tribes and bands within the Duwamish, Suquamish, Tulalip and Muckleshoot nations.

ILLNESS PROTOCOLS AND SAFETY

If you feel ill or exhibit respiratory or other symptoms, you should not come to class. Seek medical attention if necessary and notify your instructor(s) as soon as possible by email. Follow the [COVID-19 Public Health Flowchart](https://www.ehs.washington.edu/system/files/resources/COVID-19-public-health-flowchart.pdf) [↗](https://www.ehs.washington.edu/system/files/resources/COVID-19-public-health-flowchart.pdf) (<https://www.ehs.washington.edu/system/files/resources/COVID-19-public-health-flowchart.pdf>) if you have COVID-19 symptoms, exposure or test positive, and adhere to the [UW Face Covering Policy](https://www.ehs.washington.edu/covid-19-prevention-and-response/face-covering-policy) [↗](https://www.ehs.washington.edu/covid-19-prevention-and-response/face-covering-policy) (<https://www.ehs.washington.edu/covid-19-prevention-and-response/face-covering-policy>).

Additional recommendations include getting your [annual flu shot](https://wellbeing.uw.edu/flu-vaccination/) (<https://wellbeing.uw.edu/flu-vaccination/>) and getting boosted with the updated COVID vaccines (available [at clinics and pharmacies, as well as through UW Medicine](https://www.washington.edu/coronavirus/vaccines/) [↗](https://www.washington.edu/coronavirus/vaccines/) (<https://www.washington.edu/coronavirus/vaccines/>) and local health agencies).

Please check your email and CANVAS announcements daily BEFORE coming to class. If we need to conduct class remotely because the instructor or a guest speaker is unable to attend in person, we will send all registered students an email and/or post a CANVAS announcement with a Zoom link for remote instruction or a plan for making up the class.

Course Schedule

Click the following link to view the current schedule:

[ENV H 452-552 2024 Spring Schedule](#)

(<https://canvas.uw.edu/courses/1719050/files/118318466/download>)

Course Description

This course will review environmental detection and control of pathogenic organisms. The first half of the course will cover methods of sample collection, processing and target detection. The second half will examine methods of decontamination and disinfection, as well as other engineered controls for environmentally transmitted pathogens. This course will be of use for public health and health care professionals, microbiologists, civil and environmental engineers, environmental scientists and bio-defense specialists.

Course Learning Objectives

At the conclusion of this class, students should be able to:

- Outline the various types of sampling plan and define their appropriate use;
- Describe and distinguish the major methods of sample collection and processing from various environmental media;
- Categorize the various methods to detect environmentally transmitted pathogens;
- Explain the advantages and disadvantages of each type of detection methods;
- Identify major approaches to control and prevent environmentally transmitted pathogens
- Distinguish between sterilization, disinfection, and preservation methods
- Identify different classes of disinfectants and explain disinfection kinetics

- Describe several methods to decontaminate infectious wastes and acceptable biosafety practices in the laboratory
- Summarize the importance of clinical hygiene and institutional infection control practices
- Explain the principles of a multi-barrier approach to controlling microbial hazards

ADDITIONAL GRADUATE COURSE OBJECTIVES: At the conclusion of this class, students in the graduate section (ENVH 542) should be able to:

- Formulate, plan and recommend a sampling/detection strategy for detection of a selected pathogen or other microbial hazard in a specific environmental medium.
- Propose and communicate a control plan for microbial hazards in a specific scenario
- Anticipate and assess obstacles or barriers to implementation of both the sampling/detection strategy and control plan.

Council for Education of Public Health (CEPH) Competencies

N/A

Required Textbooks & Readings

The recommended text for this course is the Third Edition of Environmental Microbiology (Pepper, Gerba, and Gentry, Academic Press). Additional Readings and course materials will be available through the course webpage. The following texts and journals are recommended references for more in-depth detail on course topics:

Books-

Manual of Environmental Microbiology, 4th edition, ASM Press

Disinfection, Sterilization and Preservation, 6th edition, LWW

Metcalf and Eddy's Wastewater Engineering: Treatment and Reuse, McGraw-Hill Water Quality and Treatment, 6th edition, AWWA

Bioaerosols Handbook, Lewis

Journals-

Journal of Applied Microbiology Letters in Applied Microbiology

Applied and Environmental Microbiology Journal of American Water Works Association Journal of Water and Health

Journal of Food Protection

International Journal of Food Microbiology Water Science and Technology

Water Research Indoor Air

Emerging Infectious Disease

Journal of Clinical Microbiology

Grading

Graduate Students

Introduction Video (5%): Each student is required to submit a 1-2-minute long introduction video. The video should indicate the students name, what they like to be called, what degree program they are in, any experience they have that is relevant to the class, and what they hope to get out of the class.

Students that do not have the capacity to record a video (though most should on their phones) may

submit a 1-2 page-long statement describing the same information. Videos/Statements will be due by the beginning of the third class period.

Quizzes (20%): Students will have the opportunity to complete 4 quizzes. Quizzes will be due at 5 pm on the day indicated in the course outline. Late quizzes may be penalized 10% of point value for each class period that they are late.

Midterm Exam (20%): Midterm exam will consist primarily of short answer questions, but may include multiple choice, and fill-in the blank questions as well. Exams will be conducted online. Exam will be open book and open note. Early or make-up exams will only be offered in case of emergencies or prior arrangement with instructor. Format for early and make-up exams will be left to the discretion of instructor.

Discussions (5%): Student may earn points by providing a posting to class discussion boards.

Sampling and Detection Strategy (10%): Students will prepare a 5-page report (including tables and figures, but not including references) detailing a sampling and detection strategy for a chosen microbiological hazard and environmental media. Reports should be single spaced. Students must get approval for hazard and media selection from TA.

Control Plan (20%): Graduate students will be expected to write and submit a detailed plan to control microbiological hazards in a specific scenario. Papers are expected to be as long as necessary to cover the topic, but should not exceed 10 pages of text single spaced (including tables and figures, but not including references). Additionally, students will be expected to present their sampling and control plans during the last week of class. Students must get approval of microbiological hazard and scenario selection from TA.

Final Exam (20%): Final Exam will be offered on ONLINE during finals week. Final exam will be comprehensive and will consist of short answer multiple choice, true/false-explain, and problem solving questions. Exam will be open book and open note.

Undergraduate Students

Introduction Video (5%): Each student is required to submit a 1-2-minute long introduction video. The video should indicate the students name, what they like to be called, what degree program they are in, any experience they have that is relevant to the class, and what they hope to get out of the class. Students that do not have the capacity to record a video (though most should on their phones) may submit a 1-2 page-long statement describing the same information. Videos/Statements will be due by the beginning of the third class period.

Quizzes (20%): Students will have the opportunity to complete 4 quizzes. Quizzes will be due at 5 pm on the day indicated in the course outline. Late quizzes may be penalized 10% of point value for each class period that they are late.

Midterm Exam (25%): Midterm exam will consist primarily of short answer questions, but may include multiple choice, and fill-in the blank questions as well. Exams will be conducted online. Exam will be open book and open note. Early or make-up exams will only be offered in case of emergencies or prior arrangement with instructor. Format for early and make-up exams is left to the discretion of instructor.

In the News and Discussions (15%): Student may earn points by providing an "In the News" article and a posting to class discussion boards.

Graduate Student Questions (10%): Undergraduates may earn points by watching graduate student control plan presentations and submitting a question for each of the presentations.

Final Exam (25%): Final Exam will be offered on ONLINE during finals week. Final exam will be comprehensive and will consist of short answer multiple choice, true/false-explain, and problem solving questions. Exam will be open book and open note.

Grading Criteria

Grades will be assigned according to the point distribution below.

%	Grade point
>95%	4
94	3.9
93	3.8
92	3.7
91	3.6
90	3.5
89	3.4
88	3.3
87	3.2
86	3.1
85	3
84	2.9

83	2.8
82	2.7
81	2.6
80	2.5
79	2.4
78	2.3
77	2.2
76	2.1
75	2
74	1.9
73	1.8
72	1.7
71	1.6
70	1.5
69	1.4
68	1.3
67	1.2
66	1.1

Late assignment policy

It is essential that assignments are turned in on time to facilitate grading in a timely manner. Late assignments without prior approval may be penalized 10% per class period late.

Student responsibilities

Students are expected to arrive on time and be ready to start right at 11:30 AM.

If students must miss a class due to illness, the instructors should be notified as soon as possible. Students should notify instructors of any other absence in advance to discuss possibility of make up work.

Students are expected to come to class prepared (keep up with the readings and video lectures).

Above all, ask questions.

Communication and Writing Skills

Communication through writing and speaking is an important transferable skill for all career pathways. Establishing a strong foundation in communication skills will help you be successful throughout your future course work and career. Therefore, this course includes assignments with the goal to help you identify areas of strength and improvement in your communication. If you feel that you could benefit from additional opportunities to improve your writing skills in particular, a list of resources at the UW and others accessible online can be found on the SPH website [here](https://sph.washington.edu/sites/default/files/2020-09/Writing-Resources-9.24.20.pdf)  (<https://sph.washington.edu/sites/default/files/2020-09/Writing-Resources-9.24.20.pdf>).

Important Policies & Resources

Academic Integrity

Students at the University of Washington (UW) are expected to maintain the highest standards of academic conduct, professional honesty, and personal integrity.

The UW School of Public Health (SPH) is committed to upholding standards of academic integrity consistent with the academic and professional communities of which it is a part. Plagiarism, cheating, unauthorized use of artificial intelligence (AI) tools, and other misconduct are serious violations of the University of Washington [Student Conduct Code \(WAC 478-121\)](#) .

(<https://apps.leg.wa.gov/WAC/default.aspx?cite=478-121>). We expect you to know and follow the university's policies on cheating and plagiarism, and the SPH Academic Integrity Policy. Any suspected cases of academic misconduct will be handled according to University of Washington regulations. For more information, see the University of Washington [Community Standards and Student Conduct](https://www.washington.edu/cssc/) (<https://www.washington.edu/cssc/>).

Access and Accommodations

Your experience in this class is important to me. It is the policy and practice of the University of Washington to create inclusive and accessible learning environments consistent with federal and state law. If you have already established accommodations with Disability Resources for Students (DRS), please activate your accommodations via myDRS so we can discuss how they will be implemented in this course.

If you have not yet established services through DRS, but have a temporary health condition or permanent disability that requires accommodations (conditions include but not limited to; mental health, attention-related, learning, vision, hearing, physical or health impacts), contact DRS directly to set up an Access Plan. DRS facilitates the interactive process that establishes reasonable accommodations. Contact DRS at [disability.uw.edu](https://depts.washington.edu/uwdrs/) (<https://depts.washington.edu/uwdrs/>).

Religious Accommodations

Washington state law requires that UW develop a policy for accommodation of student absences or significant hardship due to reasons of faith or conscience, or for organized religious activities. The UW's policy, including more information about how to request an accommodation, is available at [Religious Accommodations Policy](https://registrar.washington.edu/staffandfaculty/religious-accommodations-policy/) (<https://registrar.washington.edu/staffandfaculty/religious-accommodations-policy/>). Accommodations must be requested within the first two weeks of this course using the [Religious Accommodations Request form](https://registrar.washington.edu/students/religious-accommodations-request/) (<https://registrar.washington.edu/students/religious-accommodations-request/>).

Inclusion & Diversity

Diverse backgrounds, embodiments and experiences are essential to the critical thinking endeavor at the heart of University education. In SPH, we are expected:

1. To respect individual differences, which may include, but are not limited to, age, cultural background, disability, ethnicity, family status, gender, immigration status, national origin, race, religion, sex, sexual orientation, socioeconomic status and veteran status.

2. To engage respectfully in the discussion of diverse worldviews and ideologies embedded in course readings, presentations and artifacts, including those course materials that are at odds with personal beliefs and values.
3. To encourage students with concerns about classroom climate to talk to their instructor, adviser, a member of the departmental or SPH EDI Committee, the Assistant Dean for EDI, or the program's director.

Classroom Climate

We are co-creators of our learning environment. It is our collective responsibility to develop a supportive learning environment for everyone. Listening with respect and an open mind, striving to understand others' views, and articulating your own point of view will help foster the creation of this environment. We engage our differences with the intent to build community, not to put down the other and distance our self from the other. Being mindful to not monopolize discussion and/or interrupt others will also help foster a dialogic environment.

The following guidelines can add to the richness of our discussion:

- We assume that persons are always doing the best that they can, including the persons in this learning environment.
- We acknowledge that systematic oppression exists based on privileged positions and specific to race, gender, class, religion, sexual orientation, and other social variables and identities.
- We posit that assigning blame to persons in socially marginal positions is counter-productive to our practice. We can learn much about the dominant culture by looking at how it constructs the lives of those on its social margins.
- While we may question or take issue with another class member's ideology, we will not demean, devalue, or attempt to humiliate another person based on her/his experiences, value system, or construction of meaning.
- We have a professional obligation to actively challenge myths and stereotypes about our own groups and other groups so we can break down the walls that prohibit group cooperation and growth. [Adapted from Lynn Weber Cannon (1990). *Fostering positive race, class and gender dynamics in the classroom. Women Studies Quarterly, 1 & 2, 126-134.*]

We are a learning community. As such, we are expected to engage with difference. Part of functioning as a learning community is to engage in dialogue in respectful ways that supports learning for all of us and that holds us accountable to each other. Our learning community asks us to trust and take risks in being vulnerable.

Here are some guidelines that we try to use in our learning process:

- LISTEN WELL and be present to each member of our group and class.
- Assume that I might miss things others see and see things others miss.
- Raise my views in such a way that I encourage others to raise theirs.
- Inquire into others' views while inviting them to inquire into mine.

- Extend the same listening to others I would wish them to extend to me.
- Surface my feelings in such a way that I make it easier for others to surface theirs.
- Regard my views as a perspective onto the world, not the world itself.
- Beware of either-or thinking.
- Beware of my assumptions of others and their motivations.
- Test my assumptions about how and why people say or do things.
- Be authentic in my engagement with all members of our class.

Inclusion and Diversity

Diverse backgrounds, embodiments and experiences are essential to the critical thinking endeavor at the heart of University education. In SPH, we are expected:

1. To respect individual differences, which may include, but are not limited to, age, cultural background, disability, ethnicity, family status, gender, immigration status, national origin, race, religion, sex, sexual orientation, socioeconomic status and veteran status.
2. To engage respectfully in the discussion of diverse worldviews and ideologies embedded in course readings, presentations and artifacts, including those course materials that are at odds with personal beliefs and values.
3. To encourage students with concerns about classroom climate to talk to their instructor, adviser, a member of the departmental or SPH EDI Committee, the Assistant Dean for EDI, or the program's director.

Pronouns

We share our pronouns because we strive to cultivate an inclusive environment where people of all genders feel safe and respected. We cannot assume we know someone's gender just by looking at them. So we invite everyone to share their pronouns.

Bias Concerns

The Office of the Dean has a [student concern policy](https://sph.washington.edu/students/student-concern-policy), a faculty concern policy and standard HR procedures for staff concerns. Our 2018 climate survey states that most people in SPH do not report bias incidents because they do not know where to go. Students are encouraged to report any incidents of bias to someone they feel comfortable with, including instructors, advisers or department staff. They can email dcinfo@uw.edu for immediate follow up. Bias concerns can be anonymously and confidentially reported via the online form found here: <https://sph.washington.edu/about/diversity/bias-concerns>. Data is collected by the Assistant Dean for EDI and the Director of Program Operations for Student and Academic Services and tracked for resolution and areas are identified for further training.

Sexual Harassment

Sexual harassment is a form of harassment based on the recipient's sex that is characterized by:

1. Unwelcome sexual advances, requests for sexual favors, or other verbal or physical conduct of a sexual nature by a person who has authority over the recipient when:
 - Submission to such conduct is an implicit or explicit condition of the individual's employment, academic status, or ability to use University facilities and services, or
 - Submission to or rejection of the conduct affects tangible aspects of the individual's employment, academic status, or use of University facilities.
2. Unwelcome and unsolicited language or conduct that creates an intimidating, hostile, or offensive working or learning environment, or has the purpose or effect of unreasonably interfering with an individual's academic or work performance.

If you believe that you are being harassed, or have observed harassment, you can report it to SPH using the [bias concerns link](https://sph.washington.edu/about/diversity/bias-concerns) . The University also has designated offices to help you: [SafeCampus](https://www.washington.edu/safecampus/) ; [Office of the Ombud](https://www.washington.edu/ombud/) ; [Title IX Investigation Office](https://www.washington.edu/titleix/report/) ; and [University Complaint Investigation and Resolution Office](https://www.washington.edu/compliance/uciro/) .
