

Requirements for the MS in Environmental Health

DEOHS Core Requirements		
Choose one:		
BIOST 511	Medical Biometry I [A]	(4)
BIOST 517	Applied Biostatistics I [A]	(4)
EPI 511	Introduction to Epidemiology [A]	4
ENV H 501	Foundations of Environmental Health [A]	4
ENV H 505	Fundamentals of Env. and Occ. Toxicology [Sp]	4
ENV H 551	Human Exposure to Env. Contaminants [W]	4
Choose one:		
ENV H 543	Quantitative Microbial Risk Assessment [Sp]	(3)
ENV H 572	Environmental Risk and Society [A]	(3)
ENV H 577	Risk Assessment for Env. Health Hazards [A]	(4)
ENV H 580	Env. & Occupational Health Seminar [A,W,Sp]	1+1+1=3 ¹
Minimum Credit Subtotal		26
Degree Option Specific Requirements		
ENV H 541	Ecology of Env. Transmitted Microbial Haz. [A]	3
ENV H 552	Environmental Chemistry of Pollution [Sp]	4
Minimum 6 credits from 2 of the 3 topic areas below:		
<u>Waste Management:</u>		
ENV H 445	Solid Waste Management [A]	(3)
ENV H 546	Hazardous Waste and Public Health [W]	(3)
<u>Air Pollution:</u>		
ENV H 548	Community Air Pollution [W]	(3)
<u>Water and Wastewater:</u>		
ENV H 545	Water, Wastewater, and Health [A]	(4)
TBD	Minimum additional elective credits ²	9
ENV H 583	Thesis Research Proposal Preparation [E]	1 (+2) ³
ENV H 700	Master's Thesis [E]	9
Minimum Credit Subtotal		32
Total Minimum Credits =		58

- ENV H 580: Students are required to complete three quarters of this 1-credit course for a total of 3 credits.
- Students select electives from the following list in consultation with their faculty advisor:
 - ENV H 441: Food Protection [W, Sp] (3)
 - ENV H 442: Zoonotic Diseases and Their Control [W] (3)
 - ENV H 461: Air Pollution Control [Sp] (4)
 - ENV H 541: Ecology of Environmentally Transmitted Hazards [A] (3)
 - ENV H 542: Detection/Control of Environmentally Transmitted Microbiological Hazards [W] (3)
 - ENV H 543: Quantitative Microbial Risk Assessment [Sp] (3)
 - ENV H 556: Quantitative Occupational Exposure Analysis [W] (3)
 - ENV H 570: Occupational and Environmental Epidemiology [Sp] (3)
 - ENV H 574: Probabilistic Exposure Analysis [Sp] (3)
- ENV H 583 requires that students take 2 credits of either ENV H 700 (Thesis Preparation) or 600 (Independent Study) concurrently. If ENV H 700 is taken as part of this requirement, those 2 credits can count towards the minimum 9 credit ENV H 700 requirement.

[A] = Typically offered in autumn quarter
 [W] = Typically offered in winter quarter
 [Sp] = Typically offered in spring quarter
 [S] = Typically offered in summer quarter
 [E] = Available every quarter

Degree Competencies for the MS in Environmental Health

SPH/CEPH – Foundational Public Health Knowledge Learning Objectives

Profession & Science of Public Health

1. Explain public health history, philosophy and values
2. Identify the core functions of public health and the 10 Essential Services
3. Explain the role of quantitative and qualitative methods and sciences in describing and assessing a population's health
4. List major causes and trends of morbidity and mortality in the US or other community relevant to the school or program
5. Discuss the science of primary, secondary and tertiary prevention in population health, including health promotion, screening, etc.
6. Explain the critical importance of evidence in advancing public health knowledge

Factors Related to Human Health

7. Explain the effects of environmental factors on a population's health
8. Explain biological and genetic factors that affect a population's health
9. Explain behavioral and psychological factors that affect a population's health
10. Explain the social, political and economic determinants of health and how they contribute to population health and health inequities
11. Explain how globalization affects global burdens of disease
12. Explain an ecological perspective on the connections among human health, animal health, and ecosystem health (e.g., One Health)

DEOHS All Graduate Student Degree Competencies

1. Apply the major components of the environmental and occupational health framework (problem formulation, hazard identification, dose-response assessment, exposure assessment, risk characterization, risk communication, risk management, evaluation, stakeholder engagement, and research) in order to address environmental public health problems experienced in the community or work environment.
2. Use epidemiological and statistical techniques to describe and analyze environmental and occupational health data
3. Formulate hypotheses and design and conduct experiments to test such hypotheses aimed at advancing knowledge in environment and occupational health sciences

DEOHS Degree-Specific Competencies – MS-EH

1. Identify and characterize chemical and microbiological hazards in the environment and describe their sources, pathways, and routes of exposure
2. Apply measurement and/or modeling methods to chemical and microbiological hazards
3. Recognize and explain personal, administrative/regulatory, and engineering controls for environmental hazards
